LAHSA HABITABILITY STANDARDS INSPECTION FORM

2022-2023

The standards for housing unit inspections for Permanent Housing, are the ***Housing Habitability Standards***. These inspections are completed by Housing Navigators or TLS/RRH Case Managers, or anyone else assisting a participant to move into permanent housing with LAHSA and/or CoC funding. They apply only when a participant is receiving financial assistance and moving into a new unit (except for any unit funded by a Housing Authority program or voucher—in those situations, the Housing Authority conducts a "Housing Quality Standard Inspection"). Inspections must be conducted ***before initial occupancy*** (and ***annually for programs funded by COC)*** by the case manager or other program assigned staff.

Participant Name and HMIS #: _____

Unit Address:

INSTRUCTIONS: Mark each statement as **'A' for approved** or '**D' for deficient**. The property must ***meet all standards*** in order to be approved. A copy of this checklist should be placed in the client file, a copy should be given to the landlord and a copy must be uploaded to HMIS (or if the agency is a Victim Services Provider, into their comparable data base). ***If the unit does not pass, discuss changes needed with the landlord and notate the plan for when changes will be resolved.*** The changes must be completed before any funds can be given to the landlord, and before the participant can move into the unit.

Approved or Deficient	Element	Notes
	1. ***Structure and materials***: Does the building feel safe and structurally sound (like it isn't going to fall down).	
	2. ***Access*****:** The housing must be accessible and capable of being utilized without having to enter through another person's private property. Structures must provide fire escape options other than front door.	
	3. ***Space and security***: Each resident must be afforded adequate space and security for themselves and their belongings. Each resident must be provided with an acceptable place to sleep and doors to lock.	
	4. ***Interior air quality***: Every room or space must be provided with natural or mechanical ventilation. Must have window(s) or fan or A/C. (Turn on fans or A/C to confirm working)	

	5. ***Water Supply*:** The water supply must be free from contamination. (Turn on all faucets to confirm that there is hot water, that it is working, and water is clear)	
	6. ***Sanitary Facilities*:** Residents must have access to sufficient sanitary facilities that are in proper operating condition; may be used in privacy and are adequate for personal cleanliness. IF shared space, this still must be reviewed.	
	7. ***Thermal environment***: The housing must have adequate heating and/or cooling facilities in proper operating condition (turn on to confirm working).	
	8. ***Lighting and electricity*:** The housing must have adequate natural or artificial light to permit normal indoor activities and to support the health and safety of residents. Sufficient electrical outlets must be provided to permit use of essential electrical appliances while assuring safety from fire.	
	9. ***Food preparation and refuse disposal*:** All food preparation areas must contain suitable space and equipment to store, prepare, and serve food in a sanitary manner. ***If shared, inspect shared space for compliance.***	
	10. ***Sanitary condition*:** The housing and any equipment must be maintained in sanitary condition.	
	11. ***Fire safety*:** Both conditions below must be met to for this standard. a. Each unit must include at least one battery-operated or hard-wired smoke detector and one carbon monoxide detector in proper working condition on each occupied level of the unit. Smoke detectors must be located, to the extent practicable, in a hallway adjacent to a bedroom. If occupied by a hearing-impaired person, smoke detectors must have an alarm system designed for hearing impaired persons in the bedroom of the hearing-impaired person.	
	11. b. The public areas of all housing must be equipped with a sufficient number, but not less than one for each area, of battery-operated or hard-wired smoke detectors. Public areas include, but are not limited to, laundry rooms, day care centers, hallways, stairwells, and other common areas.
